Other Impactful Experiences

To provide some additional context around each individual's application, admissions committees are interested in learning more about the challenges applicants may have overcome in life. The following question is designed to give you the opportunity to provide additional information about yourself that is not easily captured in the rest of the application.

Please consider whether this question applies to you. Medical schools do not expect all applicants to answer "yes" to this question. This question is intended for applicants who have overcome major challenges or obstacles. Some applicants may not have experiences that are relevant to this question. Other applicants may not feel comfortable sharing personal information in their application.

Have you overcome challenges or obstacles in your life that you would like to describe in more detail? This could include lived experiences related to your family background, financial background, community setting, educational experiences, and/or other life circumstances.*

How should I know if I should answer "Yes" to this question?

- ☐ Yes
- ☐ No

Other Impactful Experiences Description

The following examples can help you decide whether you should respond "yes" to the question, and if so, what kinds of experiences you could share. Please keep in mind that this is not a fully inclusive list and any experiences you choose to write about should be ones that directly impacted your life opportunities.

Example Experiences

- **Family background:** serving as a caretaker of a family member (e.g., siblings, parent/guardian), first generation to college.
- **Community setting:** rural area, food scarcity, high poverty or crime rate, lack of access to regular healthcare (e.g., primarily used urgent care clinics or emergency room, no primary care physician).
- **Financial background:** low-income family, worked to support family growing up, work-study to pay for college, federal or state financial support.
- **Educational experience:** limited educational opportunities, limited access to advisors or counselors who were knowledgeable/supportive of higher education requirements.
- **Other general life circumstances** that were beyond your control and impacted your life and/or presented barriers.

Writing Instructions

- **Select the most impactful experiences.** Describe the challenge(s) or hardship(s) you consider most impactful in your life.
- **Write about how experiences impacted your life.** Write about any topics you deem important to discuss, including information that might be mentioned elsewhere in your application (e.g., your personal statement). You can use the space provided in this question to further elaborate on those topics, if desired.
- **Use a narrative style format.** Describe your impactful experience(s) in a narrative format to help admissions committees understand your story, but be mindful of the 1,325 character limit.

Letters of Evaluation

Add Letter of Evaluation/Recommendation

Many medical schools determine whether or not an applicant has met their letter of evaluation/recommendation requirements by the type of letters they receive in support of an application. For example, a medical school may require a committee letter OR three individual letters in support of your application.

Please review the AMCAS Applicant Guide for more information about Letters of Evaluation.

Please identify the type of letter you wish to enter. If you are uncertain as to the type of letters provided by your school/institution, please ask your pre-health advisor or career center prior to answering this question.

☐

Committee Letter:

A committee is a letter authored by a pre-health committee or pre-health advisor and intended to represent your institution's evaluation of you. A committee letter may or may not include additional letters written in support of your application. A Committee Letter is sometimes called a composite letter.

☐

Letter Packet:

A packet or set of letters assembled and distributed by your institution, often by the institution's career center.

☐

Individual Letter:

An individual letter refers only to a letter authored by, and representing, a single letter writer. **If you have already included an individual letter within either a committee letter or letter packet, you do not need to add a separate entry for the individual letter.**

Select a meaningful Letter Title, as you may need this title later to identify a letter. For example, if this letter were from the University Of X, with a primary contact of John Doe, and you intend to have this letter sent only to MD/PhD programs, you might create a title of "UX_Doe_MD_PhD".

Application and Acceptance Protocols for Applicants

SHARE: f t in e

Recommendations to help ensure that all MD and MD-PhD applicants receive timely notification about the outcome of their AMCAS® application. These guidelines are not intended to supersede the policies, timelines, or discretion of individual schools or programs. Each applicant is expected to become familiar with the procedures and requirements of each school to which they apply.

The following steps are recommended to help ensure that all MD and MD-PhD applicants receive timely notification about the outcome of their applications, and to protect schools and programs from having unfilled positions in their entering classes. These protocols are often referred to as "Traffic Rules" by admissions officers and prehealth advisors. Prospective applicants, their advisors, and admission staff at medical schools and programs should all be aware of these Application and Acceptance Protocols for applicants. An applicant's actions during the admissions process should be conducted in the spirit of professionalism and ethics expected of a future physician.

Letter Writer Guidelines

Guidelines for Writing a Letter of Evaluation for a Medical School Applicant

Thank you for agreeing to write a letter of evaluation for a medical school applicant!

The guidelines are intended to enhance the letter-writing process by providing a general framework of best practices and relevant content for letter writers to follow. They are optional and can be applied to both individual and committee letters.

Guidelines

1. Provide an accurate assessment of the applicant's suitability for medical school rather than advocate for the applicant.
2. Briefly explain your relationship with the applicant:
 - How long have you known the applicant?
 - In what capacity have you interacted (e.g., faculty, premedical advisor, supervisor)?
 - Are your observations of the applicant direct or indirect?
3. Quality of information is more important than letter length. Focus on the applicant rather than details of the lab, course, assignment, job, or institution.
4. Only include information on grades, GPA, or MCAT scores *if* you also provide context to help interpret them. Grades, GPA, and MCAT scores are available within the application.
